What are Internet TV Sets?

- *TV's that “stream” Internet Content from the World Wide Web.
- *Latest sets contain “Apps” that can show Facebook, Youtube and Google content.
- *Some ISP's have signed up with Manufacturers to provide additional content (e.g. Bigpond Movies).

Latest Announcements

- * Sony have signed a deal with Google TV
- * LG & Samsung have signed a deal with Telstra Bigpond
- * Samsung have announced that they will have “Adaptive Streaming” in new 2011 TV Sets
- * Samsung already have similar deals in U.S.
